It is sometimes referred to as "Fly" for short. Although it is the second fastest stroke when done properly by a skilled athlete, it requires a very exact technique, strength and rhythm. It does requires a lot of practice to perfect it, but when you have it right, it is one of the most rewarding, respected and aesthetically pleasing swimming styles currently used in competition. Being able to ...

While his art was firmly planted in that era, the ideas were supposed to be of the future. Some of his fantastical predictions have come true, like home computers, self-driving cars, factory farms, flatscreen TV, robotic warehouses, remote jobs, electric cars, and the electronic home library. Other are just silly, like space hospitals, color ...

The sequence of the mouse and fly version of the gene only have a 49% similarity. In 1997 Dr Bonini and her team investigated the effect of differences in these orthologs. In fruit flies the eye gene was mutated in such that it was unable to function. Then they inserted the mouse version of the gene into the fly. The flies that got the mouse gene developed fully functioning compound eyes. In ...
